EDUCATION

Heriot-Watt University - BSc Computer Science & Artificial Intelligence *(First Class Honours)* 2021-2025

SKILLS

Development/Programming| Python, SQL, Java, JavaScript, C, R
AI/ML| Supervised/Unsupervised Machine Learning, Predictive Modelling, NLP, Text Embeddings, RAG
Data Analytics| Pandas, NumPy, Statistical Analysis, Hypothesis Testing, Data Visualisation
Software Development| Node.js, React, APIs, Data Pipelines, Git/GitHub, Docker, CI/CD, Pytest, JUnit.
Databases| MySQL, MongoDB, Firebase, Firestore

EXPERIENCE

Technical Sales **September 1st 2025 - November 30th 2025**

WiseApp Global

- Identified 20-30 prospective leads and delivered 8-9 product demonstrations for a meeting room management solution and visitor management solution, supporting the team's closure of 7-10 clients.
- Tested 2 new product features and prepared requirements and compliance documents for clients.

Teaching Assistant **January 1st 2025 - April 15th 2025**

Heriot-Watt University

- Supported 100+ students in Web Design, Databases, and Computer Systems labs, covering HTML/CSS, SQL, assembler, and Linux.
- Demonstrated and graded 5 in-person lab assessments, providing feedback on programming exercises and student submissions.

Business Intelligence & IT Intern **June 1st 2023 - July 30th 2023**

WiseApp Global

- Compared product pricing, hardware specifications, and competitor offerings in Excel; configured and tested hardware and software before client delivery.

GDSC - Core Team Lead Member **August 15th 2022 - July 14th 2023**

Google Developers Student Club at Heriot Watt University

- Co-organised coding sessions and workshops every 2–3 weeks, with over 30+ attendees per session.
- Coordinated event logistics and promotions and co-hosted 3 industry networking and speaker events involving Google, Microsoft, AWS, and local companies, reaching 100+ attendees.

PROJECTS

Deriv AI Talent Sprint - Autonomous AI Agents (lablab.ai)

- Built and deployed a serverless AI agent using Google ADK, FastAPI, and Cloud Run to process employee data and generate HR onboarding documents through multi-step workflows.

Sentiment Analysis of E-commerce Reviews (Amazon)

- Built a machine learning model to classify customer sentiment in Amazon product reviews using Python, scikit-learn, NLTK, TF-IDF, n-grams, and supervised NLP classifiers.

Predictive Modeling of Coffee Quality Using Machine Learning

- Developed machine learning classifiers to predict coffee quality grades from sensory and physical data using exploratory data analysis, feature engineering, and cross-validation.

Inspirely: Full-Stack Collaboration Platform

- Co-developed a collaboration platform using React, Node.js, and Firebase, implementing real-time chat, video communication, and task management within a team-based Scrum workflow.
